## info

We are talking about a 10-year architectural collaboration and several proud construction projects, some of which have won special architectural awards...

Each of the structures has a double thought but has an equal and aligned structure.

## info

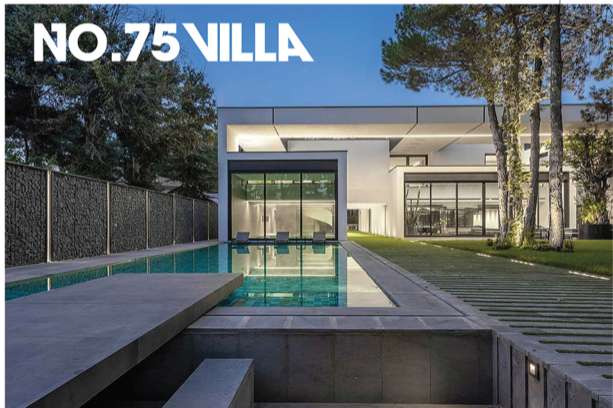

The Architecture of No.75-VILLA is derived from the subtraction of volumes.

The space is formed from aggregation and subtraction of pure masses focusing on spatial experience, in which the deformed solid geometry and subtractions add up to shape a vertu of voids co-responding to characteristics, demands, and designing outlooks. This has resulted in winning awards for the design of this work.

Samaneh & Amir Ghasempour  
| 3rd Skin Architects

**Pro** easy glass handrail systems
